

2009 ACCESSIBLE DESIGN AWARDS

Public Design – Award of Merit **Lahaina Small Boat Harbor Comfort Station** **Improvements**

State of Hawai'i, Department of Land and Natural
Resources

Replacing one built in 1983 that was inadequate to services the demands of the boat harbor, this new facility increases the number of fixtures and also added changing tables and drinking fountains. In addition, improvements were made to security and lighting, increased natural ventilation and the design used water conservation fixtures. Parking, including new accessible parking, was created on this existing site along with ramped walkways to service the many tourists and vendors that visit the pier. The community expressed their desire that the new facility maintain and reflect the historical character of the area. For this reason, many public meetings were held and historical research done to preserve the character of Lahaina in the design.
